TECHNICAL SKILLS

- Python, Java, C, C++, C#, JavaScript, TypeScript, Vim, Linux, Azure Open AI, Copilot
- Pandas, Scikit-Learn, PySpark, Matplotlib, Playwright
- Amazon RDS, Snowflake, MongoDB, DynamoDB, Cassandra
- Docker, Kubernetes, Terraform, Ansible, Jenkins
- Spring Boot, AngularJS, ReactJS, NodeJS, Flask, HTML, CSS
- AWS, GCP, Azure, Shell Scripting
- SQL, Tableau, MS Office
- RestAPIs, ServiceNow API, JSON, HTML
- Jira, GitHub, GitLab, Bitbucket
- Test driven development (TDD) (PyTest, JUnit, Jest)
- End-to-end development
- Data Structures, Algorithms
- Agile/Scrum methodology, CI/CD pipeline

EDUCATION

Georgia Institute of Technology Master of Science, Computer Science - Artificial Intelligence Track (In-Progress)

University of Texas at Austin Bachelor of Science, Electrical and Computer Engineering

WORK EXPERIENCE

CVS Health: Software Engineering Developer Feb 2025 - Present

- Tuned Claude AI Agents to transcribe petabytes of archived video, scorm, and image data for new hire learning platform
- Created Workday to GCP ETL pipeline using Python, Pyspark, PostgreSQL, and Github to GCP CI/CD
- Pipeline provided HR bonus plan eligibility data for > 250,000 employees that was inaccessible before
- Retell AI Integration: Prompt engineered AI call flows for 5 bots. developed ServiceNow API python automations
- Retell AI Integration: Conducted daily UAT Meetings
- Developed Python reporting tools for 24 sunset data applications. Hosted data on GCP

Data Annotation: Software Developer Mar 2024 - Jan 2025

- Prompt Engineering: Developed complex programming problems for LLMs in development using Java, Python, Scikit-Learn, C, C++, JavaScript, etc.
- Programmed full stack applications, microservices, cloud server provisioning scripts, data science scripts, testing suites, and other SWE solutions
- Provided an average of 80 different self-developed programs as teaching data for each LLM

Amazon: Prime Air Drone Software Engineering Intern, Seattle, Washington May 2022 - Aug 2022

- End to End Project: Created an automated internal tool as a part of the Prime Air Drone Program
- Decreased drone downtime by 38%
- Used Python, AWS SNS, and AWS lambda

Ericsson: Engineering Intern, Plano, Texas Jun 2021 - Aug 2021

- Developed two automated internal tools using Python, Paramiko, and VBA
- Tools increased cell tower data processing performance by 84% and 50% respectively
- Provided day to day cell tower auditing support for offshore teams

PROJECTS

- Created website to sell custom Notion Templates using TypeScript, HTML, CSS, RESTfulAPI calls, and a MongoDB back end in a team
- Optimized a predictive model with various Pandas classifiers and extensive historical data for forecasting team wins and losses in the 2023 NBA season. Demonstrating a refined approach to data analysis, this effort emphasizes precision in outcome predictions and published results onto Medium ([Click for Publication](#))
- of a website, employing Node.js, React.js, MongoDB, and
- Conducted comprehensive research on the implementation of an Inertial Navigation System (INS) for John Deere in order to optimize seed tractors to efficiently distribute seeds on uneven surfaces. The system seamlessly integrated Bluetooth, GPS, and an Inertial Measurement Unit (IMU) programmed in Python, contributing to enhanced operational effectiveness ([Click for Report](#))

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals Sept 2024
- GCP Associate Cloud Engineer Jul 2025
- AWS Certified Cloud Practitioner May 2024

NATIONALITY: U.S. Citizen
